

P1	Imaging Insights for OPV Module Performance and Stability	H. Hoppe <i>et al.</i>
P2	Electrical characterisation of solution processed Cu(In,Ga)Se ₂ solar cells	A Eeles <i>et al.</i>
P3	Enhanced performance stability of organic photovoltaic cells by cross-linking of the electron-donor polymer	J. Farinhas <i>et al.</i>
P4	Enhancing the efficiency of organic photovoltaics by adding F8T2 or pBTTT as the second donor polymer toPTB7: PCBM binary system	R. Oliveira <i>et al.</i>
P5	Organic materials for environmentally friendly organic photovoltaics	C. Costa <i>et al.</i>
P6	Meso-substituted BODIPY small molecules as highly suitable donor materials for organic photovoltaic cells: Synthesis and Characterization	A. Aguiar <i>et al.</i>
P7	300 Hour Outdoor Perovskite Stability COST Collaboration Inter Laboratory Report	D. Tanenbaum <i>et al.</i>
P8	Patterning of organic single crystals by lithography and dry etching	S. Sequeira <i>et al.</i>
P9	Macro and micro characterisation of a mixed cation/mixed halide perovskite	M.A. Barreiros <i>et al.</i>
P10	The role of Charge transfer (CT) states in degradation of DBP-C70 based organic solar cells	G. Sherafatipour <i>et al.</i>
P11	Density of States Mapping in Organometallic Perovskite by Energy-Resolved Electrochemical Impedance Spectroscopy	E. Majiková <i>et al.</i>
P12	Light-Induced Degradation of Perovskite Solar Cells: the Role of Spiro-MeOTAD Additives	J. Bastos <i>et al.</i>
P13	High efficiency of Sb ₂ S ₃ based hybrid solar cells with chitosan, PEG and electrolyte as a solid holder	V. Lojpur <i>et al.</i>
P14	Design Automation Tool for Organic TFT Technologies	A. Canelas <i>et al.</i>
P15	Printed Energy Storage Systems	M.M. Silva <i>et al.</i>
P16	Proton and alpha particles effects on different glass and polymers substrates	L. Mihai <i>et al.</i>
P17	Study of organic cells layers based on cross-linked poly(fluorene-alt-bithiophene) using THz imaging	L. Mihai <i>et al.</i>
P18	Electrophysiological signals detection using ink-jet printed polymer and the displacement current method	P. Inácio <i>et al.</i>
P19	Ink-Jet Printed Polymer Electrodes on Nano Fibrous Bacterial-Cellulose Substrates for Extracellular Signal Recording	A. Mestre <i>et al.</i>
P20	Electrical Characterization of Electrochemically Gated Graphene Field-Effect Transistor for Bioelectronic Applications	Sanaz Asgarifar <i>et al.</i>
P21	Circumvent UV-induced PC ₇₁ BM nano-morphology disorder to achieve long lifetime polymer solar cells	Q. Liu <i>et al.</i>
P22	Triindole Derivatives as efficient hole transporting materials for photovoltaic applications	D. Volyniuk <i>et al.</i>
P23	Nanostructured hybrid materials to tailor the electron donor:acceptor architecture in organic photovoltaics	C. Baleizão <i>et al.</i>
P24	Carbon Nanostructures Based Conducting Composites Replacing Counter Electrodes in Solar Cells	M. Procházka <i>et al.</i>
P25	Circuitual modelling of S-shaped J-V characteristics of perovskite solar cells	B. Romero <i>et al.</i>
P26	GOTSolar project - New technological advances for the third generation of Solar cells	L. Andrade <i>et al.</i>
P27	1000 h outdoor stability of perovskite solar cells, comparison between meso and planar multi-cation Cs/Rb perovskite solar cells	Y. Reyna <i>et al.</i>
